Document Verification & Approval Workflow

- Implemented and tested the document verification workflow for HR/Admin review.
- Added support for **Pending, Verified, and Rejected** document statuses.
- Added predefined rejection reasons.
- Ensured rejection reasons are stored with rejected documents.
- Added **Reviewed By** and **Reviewed On** date/time information.
- Updated the frontend to display verification and review information.

3. Work Plan for Tomorrow

Tomorrow I will work on connecting the **Employee and Document Verification workflow**.

1. Ensure authorized users can review documents uploaded by employees.
2. Connect the Verify/Reject action with the Employee page.
3. Display the verification result or rejection reason clearly on the Employee page.
4. Test the complete **Employee → Reviewer → Employee** workflow.
