

HUMAN RESOURCE MANAGEMENT SYSTEM (HRMS)

Project Progress & Status Report

1. Project Information

Company Name	AadhyaRaj Technologies
Project Name	Human Resource Management System (HRMS)
Reporting Day	18 th September 2026
Employee Name	Rachupalli Jyothika

Work Completed Today:

- Reviewed the existing Documents module workflow across different user roles.
- Removed the **Employee dropdown from the Employee document upload flow**, so employees can upload their own documents without selecting an employee.
- Kept the Employee selection capability for authorized roles such as **Super Admin, HR Admin, and Manager**, where required by the existing workflow.
- Reviewed the existing backend document structure, document ownership, upload flow, and Governance permissions.
- Traced how uploaded documents are associated with the user who uploaded them.
- Reviewed the existing document deletion and authorization logic without changing the existing Governance permission structure.
- Confirmed that the existing Documents functionality and role-based access should remain intact while the module is properly interconnected.

Plan for Next Week:

- Continue the **Documents module connection work** across all relevant pages and roles.
- Properly connect employee uploads, document records, requests, reviews, and authorized user actions through the same underlying data.
- Implement the required document management flow carefully so actions such as upload, review, and deletion work correctly according to existing permissions and ownership.
- Test the complete workflow across different roles to make sure the Documents module works consistently and reliably without breaking existing functionality.
